Subject: Support alternative drug testing

I am a responsible 43 year old man in Indiana. I completely support drug and alcohol testing in the workplace to make it safe.

I would be unable to give a urine specimen since I have suffered my whole life with "Shy Kidney." It sounds funny but it is not. Hair samples could be a reasonable choice for myself and others.

I have no other physical or mental disorders. I am self employed and earn over \$100,000 annually. I give speeches regularly in front of large audiences and have no other extreme shyness problems. But I can not urinate unless I am in a private locked bathroom. I don't understand it, but it is true.

Please make allowances for this condition.

Thank you
